

GhostLedger

Our money.

Our future.

Our nation.

A citizen audit of ghost public works. Paper, ground,
next step.

WE SEE WHAT THEY HIDE.

The money left. The borehole is a slab.

African budgets already publish PDFs. The gap is not another portal of the same tables. The gap is a person in a ward who can prove the tank was never welded to the plot the paper paid for.

Unaccounted billions sit in audit queries for years.

Viral totals mix debt, rumour, and dismissed claims.

Reporting a missing clinic can be unsafe.

Finding out is not the same as knowing who to write.

Built for the people who stand on the plot.

Residents

A mid-range Android, patchy data, WhatsApp already open. No account. No KYC.

Used in matatus, daladalas, trotros, market stalls, and community halls.

Monitors & journalists

A sourced clock instead of a screenshot. Named people with a legal status, not a pile-on.

Oversight offices

A public, dated trail of ground visits they can open without a login wall.

Paper and ground on the same page.

01

The paper

Allocated. Paid. Source. Date. Conservative clock of unresolved commissions, audits, and court records.

02

The ground

GPS. Status. Hash. Citizens become project auditors. Visit. Report. Expose.

03

The next step

Who to write. Which law. A letter you can copy. A WhatsApp share of the evidence hash.

Named politicians. Tracked projects. Immutable evidence.

Track the missing billions.

KES 275.4B+

Kenya's sourced unresolved stock, still counting. Recovered funds sit under it — only money an agency or a court says came back. Traced is not recovered. A dismissed viral total is not in this clock.

Zoom the plot. Stamp the visit. Name the record.

Map

Every tracked site has GPS. Zoom in. See allocated, paid, and whether anything stands on the ground.

Anonymous report

No name, phone, or photo on the server. Optional GPS. A hash that cannot quietly disappear.

Named list

Public scandals and missing-funds cases. A charge is not a conviction. Citizen indications rank separately.

Where citizens become project auditors.

Visit the site. Report what you find, or expose what was paid for and never built. Log the ground. Film it. The trail is public and dated. No account.

This is not a dashboard for Nairobi. It is a field book for the person who can still walk to the empty plot.

Accurate. Traceable. Checkable.

RULE	WHAT IT MEANS
Source on the figure	Publisher, URL, date, one line of what the document says.
Compilation date	Visible in the masthead. When facts change, the date moves.
Legal status ≠ money	A charge is not a conviction. Recovery needs a published return.
Conservative clock	Unresolved commissions, Auditor-General queries, court records.
Demo is labelled	Ward rows are composites. National numbers are sourced. Not live IFMIS.

Local law. Local offices. Same question.

REGION	COUNTRIES	LANGUAGES
East	Kenya · Uganda · Tanzania	English, Kiswahili
West	Ghana · Senegal · Togo	English, French
Central	Zambia · Malawi	English

Trust · low bandwidth · accessibility · privacy · multilingual · local relevance · clear next steps. All seven shipped, not as a checklist in a slide, as switches and letters in the product.

IMPACT

Monday morning, not a white paper.

Pick a country. See the missing money. Stand on the GPS. Leave with a letter.

Next: live audit APIs where they exist. USSD for feature phones. Arabic and Portuguese. Field partners replacing demo ward rows, country by country.

OUR MONEY. OUR FUTURE. OUR NATION.
